Quality Policy

The Global QAM shall ensure that the Quality Policy reflects the following:

- Conformance to customer requirements;
- Customer satisfaction;
- Continuous improvements of the QMS and its process;
- Conformance to ISO 9001:2015 requirements.

The Management direction commit to provide the human, infrastructure, communication and all other resources needed to continually maintain and improve the QMS and its process.

To ensure that the efficiency of the QMS is sustained, we depend on the enthusiasm and the cooperation of everyone.

Protech History & Mission

Protech Chemicals was established in 1976. Management of the company had been involved in the development of powder coatings since the late 1960's. Protech quickly grew to become Canada's largest powder manufacturer and among the five largest in the world. Since its inception, Protech has built its reputation on a quality product, innovation and an unsurpassed dedication to customer service.

Currently, Protech has two production facilities in Canada and six in the United States. As well, through the Protech/Oxyplast Group, the company has production facilities in Belgium and the Czech Republic and eighteen licensees internationally.

Protech continues to expand its product line and is now able to offer a full range of thermoset and thermoplastic powder coatings. This range of products makes the Protech/Oxyplast Group unique among global powder coating producers in terms of the breadth of technologies offered.

Protech's management is involved in all aspects of the business whether it is technical development, production or customer service. This involvement and commitment enables Protech to act decisively, respond to market demands and to resolve difficult issues quickly.

President
