Shelter from the storm

PROTECH'S THERMOSET POWDER COATINGS FOR WOOD AND OTHER HEAT SENSITIVE SUBSTRATES.
Thermolam™ powder coatings were developed to coat wood, wood products and other heat sensitive substrates using a traditional thermal cure. These powders are ideal for MDF as well as wood such as oak and maple. Thermolam™ powders are extremely durable and are available in a wide range of colors and textures. They are reclaimable, safe and environmentally friendly. Most importantly, Thermolam™ powders are backed by the technical and service expertise that has been the hallmark of Protech's leadership in the powder coating industry.

**ADVANTAGES**

- Environmentally friendly - no solvent emissions
- One coat application process
- Compatible with conventional powder application systems
- Excellent application characteristics and durability
- Wide choice of appearance capabilities
- Less sanding required for MDF products
- Significant energy, time and space savings
- Low temperature cure permits wide range of wood substrates to be powder coated
- Design friendly--provides excellent edge coverage on conventional and multi-faceted pieces
